PROFESSIONAL SUMMARY

Computer Science student at Florida International University with experience building user focused front end and interactive systems across simulation and real-world applications. Passionate about creating intuitive and engaging experiences that simplify complex workflows and make technology feel seamless for users. Experienced in React, Unity, Unreal, and 3D visualization, with a strong ability to quickly learn, collaborate across teams, and deliver high impact solutions. Brings a unique blend of technical development and creative problem solving, with proven success through internships at Universal Creative and award-winning projects at ShellHacks.

EDUCATION

Bachelor of Science, Computer Science

Expected **May 2026**

Florida International University, Miami, FL

3.40 GPA

Relevant Coursework: Website Design, Net Centric Computing, Operating Systems, Software Testing, Software Engineering I & II, Advance & Intro to Database Management, Principles of Programming Languages, Human Computer Interaction, Computer Architecture, Systems Programming in C, Data Structures, Discrete Structure, Java Programming I & II,

TECHNICAL SKILLS

Programming Languages: C#, Java, Python, C, HTML, CSS, JavaScript, XML

Tools: React, Unity, Maya, Git, GitHub, MySQL, Unreal

Core Skills: Software Development, UI/UX Prototyping, Front-End Development, 3D Visualization, Fast Learning & Adaptability

PROFESSIONAL EXPERIENCE

Universal Creative | Design Intern, Immersive Experience & Play

Oct 2025 – Jan 2026

- **Designed** and **prototyped user facing interactive** experiences, focusing on **usability** and **engagement**.
- Created 3D models and digital twins to support **front end visualization and user experience design**.
- **Collaborated** closely with designers and engineers to **refine end to end user interactions**.
- Applied **rapid learning** and **adaptability** to **integrate new tools into production workflows**.

Universal Creative | Advanced Technology Interactives | Software Intern, Virtual Attractions Jan 2025 – Apr 2025, Sep 2025 – Oct 2025

- **Developed** and **improved internal tools** using **React and front end technologies**, enhancing **usability** and team workflows.
- **Built** and **maintained** interactive simulations and **user facing features** using **Unity** and **C#**.
- **Collaborated** with cross functional teams including designers and engineers to **deliver scalable and user focused solutions**.
- **Contributed** to **improving interface usability** and performance **across development tools**.

AWARDS AND ACHIEVEMENTS

Best First Time Hacker, ShellHacks 2024 and 4th Best Overall Project

Sep 2024

- Florida's Biggest Hackathon, Awarded among **1,400+ participants** and **250+ projects** for exceptional performance in game development during a **36-hour hackathon** with key contributions to **gameplay mechanics, UI design, and audio integration**.

ACADEMIC AND PERSONAL PROJECTS

Commander Coco's Stellar Domination (C# and Unity)

Sep 2024

(Personal Team Project) Best first-time hacker winner Shellhacks 2024 Created a **2D** endless **Arcade Shooter**. ([Click to See Game Here](#))

- **Led development of game logic** and **UI systems**, designing responsive and engaging user interfaces for a **36-hour hackathon**, producing a complete playable prototype.
- **Wrote 35,930 lines of code** and made **17 commits** over the course of **36 hours** during a hackathon, contributing to core gameplay.

Elucid (C# and Unity)

May 2024 – Jul 2024

(Personal Team Project) Created a **2D Top-Down** Horror light Puzzle **Video Game**. ([Click to See Game Here](#))

- Designed and implemented **user interactions systems and gameplay flows**, improving player experience and usability.
- **Translated puzzle concepts into Unity** environments and code, leveraging visualization techniques to optimize game play mechanics and enhance user engagement.

AFFILIATIONS

Society of Women Engineers - Lead Creative Design Chair | Head of designing merchandise

Jun 2024 – Present

CodePath - Technical Interview Prep | Strengthened algorithmic and problem-solving skills

May 2024 – Present

INIT FIU - Build + AI Guild | Contributed to team technical projects

Jun 2024 – Present

Society of Women Engineers - Technical Projects Chair | Led 10+ Technical workshops per semester merchandise

Jun 2024- Jun 2025
